

Cardiology Procedures

28. Please check any of the following procedures that you perform in your practice:

None of the following apply to my practice. _____ (please initial)

Clinical Cardiology

- EKG Interpretation
- Echocardiography Interpretation
- Nuclear Cardiac Testing
- Stress Echocardiography (exercise and pharmacologic stress test)
- Tilt Table Testing
- Transcutaneous External Pacemaker Placement
- Transthoracic 2D Echocardiography, Doppler and Color Flow
- Infusion and Management of Gp IIb/IIIa, Thrombolytic and Antithrombolytic Agents

Invasive Cardiology

- Transesophageal Echocardiogram (TEE)
- Percutaneous Balloon Pericardiotomy
- Coronary Angiography (or, Arteriography)
- Diagnostic Left and Right Heart Cardiac Catheterization
- Swan Ganz Catheterization (Hemodynamic Monitoring with Balloon Flotation Devices)
- Pericardiocentesis
- Placement of Temporary Transvenous Pacemaker
- Endomyocardial Biopsy

Basic Electrophysiology

- Insertion of Permanent Pacemaker (single/dual chamber and biventricular)
- Cardioversion - Medical and Electrical

Interventional Cardiology (includes invasive procedures, plus the following)

- Insertion of Intraaortic Balloon Counter Pulsation Device
- Balloon Valvuloplasty
- Percutaneous Trans-Luminal Coronary Angioplasty (PTCA)
- Coronary Stent Placement
- Coronary Atherectomy
- Stenting

Advanced Electrophysiology (includes basic electrophysiology and the following)

- Insertion and Management of Automatic Implantable Cardioverter-Defibrillators (IC)
- Radiofrequency Ablation
- Lead Extraction
- Electrophysiology Studies
- Non-Invasive Programmed Electrical Stimulation (NIPS)

Other Procedures

- _____
- _____
- _____
- _____
